

STANDARDS AND RULES OF CONDUCT ON THE TERRITORY OF THE TECHNOLOGICAL SITE, IN THE DATA CENTER

The Customer's representatives shall:

- comply with generally accepted standards of behavior;
- comply with the rules of fire, sanitary, environmental, road, and technical safety;
- enter/exit only through specially designated service areas, entrances/exits;
- stay only on the rented premises, in a module containing the Customer's equipment, and public areas;
- stay in the Module only in overshoes or replacement shoes. When leaving the Module, the shoe covers shall be removed and placed in a special container and new shoe covers shall be put on when visiting the Module again;
- be only near its own equipment. It shall be forbidden to walk around the room and approach the equipment of other customers;
- unpack equipment beyond the Module;
- organize the removal of packaging materials and industrial waste from the Data Center and their disposal. The Customer can use garbage containers located on the territory of the Technological Site upon the agreement with the Contractor;
- park vehicles on the territory of the Technological Site only in places specially designated by the Contractor;
- take care of the Contractor's property; and
- when the Customer installs/dismantles the equipment, work shall be performed immediately after bringing in/removal of the equipment.

Representatives of the Customer shall be prohibited from:

- litter;
- stay and move on the territory of the data center without permission
- Try to cross the protected territory of the data center, avoiding the checkpoint.
- Bring drinks and/or food to the data center.
- enter the data center or cross room in winter outerwear;
- Bring firearms or bladed weapons, explosives and explosives, flammable substances (fireworks, salutes, firecrackers), highly toxic, radioactive, psychotropic substances, alcoholic beverages and other alcoholic substances into the protected territory of the data center.
- Violation of general rules and cleanliness on the territory, in buildings and structures.
- store cardboard, paper and other packaging materials in the corridors of the data center,
- Carry out film, photo and video shooting on the territory of the data center. Filming, photography and video shooting is permitted only with the permission of the General Director of the company. The customer can shoot if only his equipment and office are visible in the frame,
- demonstrate and (or) place any item outside the territory provided to it or carry out any activity outside the territory provided to it and (or) outside the service area of the technological resource;
- Bring to the territory of the data center persons who do not have this permit, including children.
- Being under the influence of alcohol or other psychoactive substances on the territory of the data center.
- Smoking in an undesignated place. To carry out work related to combustion, a separate appropriate permit is issued.
- Carry out excavation work without obtaining the appropriate permit.

Stay on the territory of the data center for more than 30 minutes after the specified time, without the permission of the head of the data center or a person authorized by the general director.

- Store material assets outside the storage area on the territory of the data center.
- Block the entrance to the protected territory of the data center by car
- Park cars in the protected area of the data center and in front of the site, leave the engine running. You must park in a designated parking lot, if available.
- In the data center area, it is prohibited to exceed 10 km when traveling by car.
 - Block access to generators, especially to the refueling area.
